SUMMARY

A GenZ AI developer from Nepal with a little bit experience of building and deploying **15+ projects** across traditional ML, LLMs, RAG, NLP, computer vision, and recommender systems. Skilled in Python, PyTorch, Transformers, LangChain, FastAPI, and Docker, with experience on delivering simple AI applications.

SKILLS

Machine Learning & AI: Python, PyTorch, Scikit-learn, Transformers (BERT, GPT, T5), natural language processing (NLP), computer vision, recommender systems, feature engineering, model training and evaluation
Generative AI: Large language models (LLMs), retrieval-augmented generation (RAG), LangChain, LangGraph, LlamaIndex, LoRA, QLoRA, PEFT, Unsloth, Axolotl, Ollama, LangSmith, DeepEval
Data and Backend: FastAPI, Streamlit, SQL, ChromaDB, FAISS, Convex, Pandas, NumPy, Plotly, REST APIs
Cloud & Development: Docker, Linux, Git, GitHub, AWS ECS, AWS Lambda, Vercel, Render, Hugging Face Spaces, Next.js, TypeScript, Tailwind CSS.

EXPERIENCE

Independent AI/ML Developer *2023 – Present*
365DaysOfData | Dec 2024 – Dec 2025 | 50+ GitHub stars | 7 forks
Year-long open-source journey from math and data fundamentals to deep learning, LLMs, RAG, and agentic AI.

- Designed, developed, and deployed **20+ AI/ML projects** spanning NLP pipelines, recommender systems, computer vision, and LLM-powered applications.
- Built and evaluated **5+ RAG systems** using LangChain, ChromaDB, and FAISS; integrated major LLM APIs, created LangGraph multi-agent workflows, and benchmarked quality with LangSmith and DeepEval.
- Deployed **9+ Streamlit applications** and delivered full-stack systems using Vercel frontends with Render-hosted backends.

PROJECTS

Nyayak *Full-Stack Legal AI Platform* | **Code** | **Live**

- Built a four-module platform featuring a legal RAG chatbot grounded in Nepal's Constitution 2072 with ChromaDB, a content-based lawyer recommender, a Dijkstra-based court navigator spanning 77 districts, and a forum using PageRank and DFS.

MeanTrainer *Full-Stack Generative AI Application* | **Code** | **Live**

- Developed an AI fitness application using Vapi voice interviews and Google Gemini to generate personalized weekly workout and diet plans; used Convex for persistence and Clerk for GitHub, Google, and email authentication.

Football Player Market Value Prediction *Machine Learning Pipeline* | **Code** | **Live**

- Scraped and cleaned **18,000+ Sofifa records**, engineered **50+ features**, and trained a gradient-boosting model achieving **94% accuracy**; deployed with Streamlit.

cineRank + Movie Recommender *NLP and Recommendation Systems* | **cineRank** | **Recommender**

- Fine-tuned BERT on IMDb reviews and achieved **92% sentiment accuracy** for cineRank; built a second movie-discovery system using TF-IDF and cosine similarity across a 5,000-movie TMDB dataset.

Additional Projects *Selected AI/ML Work* | **View All Projects**

- Cat vs Dog Classifier: VGG16 classification with 95%+ accuracy; Guess the Footballer: ResNet18 visual recognition; Image Captioning: ResNet-18 and Transformer pipeline.
- Seq2Seq Chatbot: PyTorch encoder-decoder with Luong attention; GPT from Scratch: transformer built from first principles; Choose Your Own Adventure: LLM-driven branching narratives.
- **Collections:** EDA Projects; GenAI Mini Projects: RAG, QLoRA fine-tuning, evaluation, voice and image generation; Agentic AI Projects: agents, memory, tool use, debate, and MCP; 13 More Projects: web apps, games, and CLI tools.

EDUCATION

Bachelor of Computer Science and Information Technology (BSc CSIT) *2022 – 2026 (Expected)*
Patan Multiple Campus, Lalitpur, Nepal | **Languages:** Nepali (Native), English (Fluent)
